Doing educational research : overcoming challenges in practice

Every educational research project has challenges and obstacles that need to be managed and overcome. This book uses real case studies employing a wide range of research methodologies and drawn from educational contexts across Europe to explore these challenges offering flexible and universal guidance that you can apply to your own research.

Teaching STEM in the preschool classroom : exploring big ideas with 3- to 5-year-olds

This book is designed to build educators' confidence and competence so they can bring STEM to life with young children. The authors encourage pre-K teachers to discover the value of engaging preschoolers in scientific inquiry, technological explorations, engineering challenges, and math experiences based on learning trajectories. They explain the big ideas in STEM, emphasizing teaching strategies that support these activities (such as language-rich STEM interactions), and describe ways to integrate concepts across disciplines. The text features research-based resources, examples of field-tested activities, and highlights from the classroom.

NEW BOOKS NEW CUSHIONS NEW SHELVING ARRANGEMENT

Have a seat

The Library has recently placed two sets of cushions on the bench area next to the window. Based on advice from colleagues, leather was chosen for the material to allow easy cleaning. So far, the cleaning staff loves it. Depending on your body shape and size, the assistant librarian thinks the back cushion could be a little thinner. Maybe for the rest of the bench, there could be cushions with different shapes and colours. What do you think?

No matter how comfortable the cushions are, it does make the Library a little more comfortable to look at. Come have a seat and let us know what you think!

NEW BOOKS NEW CUSHIONS NEW SHELVING ARRANGEMENT

The General Collection is reunited

With help from two HKUSPACE interns studying for their Higher Diploma in Library and Information Management, the General Collection is now shelving both Chinese and English books together.

If you remember, the two languages books used to be shelved separately with the Chinese books on the shorter shelves and the English books on the tall shelves. The reason for the new arrangement is to maximize shelf space while allowing users to discover books with a similar subject irrespective of the language.

Although the books are now shelved together, the language of the book can still be easily identified through the spine label - **ENGLISH** in blue, and **CHINESE** in purple.
